PROFESSIONAL SUMMARY

Senior Software Engineer | Java Full Stack Developer (Java 8/11/17/21) with **5+ years** designing scalable **microservices, distributed systems, cloud-native AWS architectures**, and **full stack web applications** using **Spring Boot, React.js, Angular**, and **TypeScript** for enterprise platforms. Delivered **30%+ API performance improvements**, **CI/CD pipelines**, **OAuth2/RBAC security**, and **AI automation systems** using **n8n agentic workflows, LLM APIs**, and **RAG architecture** in fast-paced **Agile** environments. Proven technical leadership in **cross-functional team collaboration** and **architecture design**.

TECHNICAL SKILLS

Languages & Backend: Java (8/11/17/21), TypeScript, JavaScript, SQL, Spring Boot, Spring MVC, Spring Cloud, Spring Security, Hibernate, REST APIs, Microservices, GraphQL, Reactive Programming, J2EE

Frontend: React.js, Angular, TypeScript, Node.js, Redux, HTML5, CSS3, Bootstrap

AI & Automation: n8n, OpenAI API, Google Gemini, Claude, GitHub Copilot, LLM Integration, Agentic Workflows, RAG Architecture, Vector Search, Prompt Engineering

Cloud & DevOps: AWS (Lambda, API Gateway, S3, EC2, EKS, ECS, CloudWatch, CloudFormation, Auto Scaling), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD, Observability, Load Balancing

Databases & Tools: MySQL, PostgreSQL, MongoDB, Redis, Git, Maven, Gradle, JUnit, Mockito, OAuth2, JWT, TDD, Code Review, Agile/Scrum, JIRA

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Java Full Stack

April 2025 – Present

Unum – Texas

- Leading **architecture design** and **technical strategy** for enterprise **microservices platform**, driving **cross-functional** team collaboration and **architecture reviews** across multiple product lines.
- Spearheading **cloud infrastructure optimization** on **AWS (EKS, ECS, Lambda, CloudFormation)**, implementing **auto-scaling strategies** and **cost optimization** initiatives across production environments.
- Mentoring engineering team on **system design** best practices, **TDD** adoption, and **Spring Boot/Spring Cloud architecture patterns**, improving **code quality** and reducing **production incidents**.

Software Engineer – Java Full Stack

Jan 2023 – March 2025

Unum – Texas

- Architected **15+ production microservices** using **Spring Boot, Spring Cloud** and **REST APIs** serving **10,000+ concurrent users** with high availability and horizontal autoscaling; reduced **API latency by 30%** and **DB query time by 40%** via **Redis caching** and query optimization.
- Implemented **RBAC, OAuth2**, and **JWT auth** using **Spring Security** across **5+ platforms**; migrated **3 monolithic apps** to **AWS Lambda/S3** via **Jenkins CI/CD**, cutting **infra costs by 25%** and **deploy time by 50%**.
- Built **React.js/Angular SPAs** with **TypeScript**, improving **rendering efficiency by 20%** and **user satisfaction by 35%**; led technical leadership and code review for **4 junior engineers** and reducing **sprint spillover by 15%** through **TDD** and **Agile** best practices.
- Designed and maintained **CI/CD pipelines** using **Jenkins** and **GitHub Actions** with **Docker containerization**, implemented observability and monitoring via **CloudWatch**, achieving **zero-downtime deployments** across all production environments.

Software Engineer – Java Full Stack

March 2021 – Dec 2022

Bristol-Myers Squibb – Texas

- Developed **HIPAA-compliant enterprise web applications** serving **5,000+ internal users** at **99.9% uptime**; engineered serverless microservices on **AWS Lambda + Docker** with **load balancing**, reducing maintenance by **20%** while scaling to **3x peak traffic**.
- Optimized **PostgreSQL** and **MySQL** queries and indexing strategies, cutting reporting pipeline runtime **from 4 hours to 45 minutes** (an **81% improvement**), enabling real-time business reporting.
- Integrated **REST APIs** with **6 external vendor systems** using **OAuth2** and **JWT**; built **Angular** and **React.js SPAs** with reusable component libraries, reducing **frontend development time by 30%**, conducted cross-functional stakeholder collaboration and architecture reviews.

PROJECTS

Intelligent Business Process Automation Platform

2025 – Present

n8n | Spring Boot | Spring Cloud | OpenAI GPT-4 | Google Gemini | TypeScript | ECS | AWS Lambda | Docker | React.js | PostgreSQL | Kafka

- Architected a multi-agent **AI automation platform** using **n8n** with **event driven architecture** that automates document processing, approval routing, and **AI-powered classification**, eliminating **40+ hours/week** of manual operations work across **3 departments**.
- Integrated **OpenAI GPT-4** and **Google Gemini APIs** with custom prompt engineering layers to extract structured data from unstructured inputs (emails, PDFs, forms) at **95%+ accuracy**, feeding downstream **Spring Boot microservices** via **REST APIs**.
- Deployed scalable **event-driven pipelines** on **AWS Lambda + Docker + ECS** with webhook triggers and **distributed tracing**; built **React.js/TypeScript** real-time monitoring dashboard with full audit logging in **PostgreSQL**.

AI-Powered Job Search Automation (n8n Agentic Workflow)

2025 – Present

n8n | Google Gemini 2.5 Flash | Apollo.io | Google Sheets API | LinkedIn / Indeed / Glassdoor | OAuth2

- Built a **3-phase agentic automation pipeline** using **n8n** workflows with system design principles that scrapes jobs across **LinkedIn, Indeed**, and **Glassdoor**, AI-tailors resumes via **Gemini API**, and automates hiring manager outreach via **Apollo.io**, reducing **application time by 80%**.
- Implemented **Google Sheets API** tracking with auto-populated job status, match scores, and metadata across **200+ applications**, with zero manual data entry.

EDUCATION

M.S. Computer Science – Campbellsville University

Jan 2023 – Dec 2023

B.S. Computer Science – The University of Texas at Dallas

Jan 2019 – Dec 2022
