## PROFESSIONAL SUMMARY

**Senior Software Engineer | Java Full Stack Developer** (Java 8/11/17/21) with **~5 years** designing **scalable microservices**, **distributed systems, cloud-native AWS** architectures, and **full stack web applications** using **Spring Boot**, **React.js**, **Angular**, and **TypeScript** for enterprise platforms. Delivered **30%+ API performance improvements**, **CI/CD pipelines**, **OAuth2/RBAC** security, and **AI automation systems** using **n8n agentic workflows**, **LLM APIs**, and **RAG architecture** in fast-paced **Agile** environments. Proven technical leadership in cross-functional team collaboration and architecture design.

## TECHNICAL SKILLS

**Languages & Backend:** Java (8/11/17/21), TypeScript, JavaScript, SQL, Spring Boot, Spring MVC, Spring Cloud, Spring Security, Hibernate, REST APIs, Microservices, GraphQL, Reactive Programming, J2EE

**Frontend:** React.js, Angular, TypeScript, Node.js, Redux, HTML5, CSS3, Bootstrap

**AI & Automation:** n8n, OpenAI API, Google Gemini, LLM Integration, Agentic Workflows, RAG Architecture, Vector Search, Prompt Engineering

**Cloud & DevOps:** AWS (Lambda, API Gateway, S3, EC2, EKS, ECS, CloudWatch, CloudFormation, Auto Scaling), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD, Observability, Load Balancing.

**Databases & Tools:** MySQL, PostgreSQL, MongoDB, Redis, Git, Maven, Gradle, JUnit, Mockito, OAuth2, JWT, TDD, Code Review, Agile/Scrum, JIRA

## PROFESSIONAL EXPERIENCE

### Senior Software Engineer – Java Full Stack *Jan 2023 – Present*

*Unum – Texas*

- Architected **15+ production microservices** using **Spring Boot, Spring Cloud** and **REST APIs** serving **10,000+ concurrent users** with high availability and horizontal autoscaling; reduced **API latency by 30%** and DB query time by **40%** via **Redis caching** and query optimization.
- Implemented **RBAC**, **OAuth2**, and **JWT** auth using **Spring Security** across **5+ platforms**; migrated **3 monolithic apps** to **AWS Lambda/S3** via **Jenkins CI/CD**, cutting infra costs by **25%** and deploy time by **50%**.
- Built **React.js/Angular SPAs** with **TypeScript**, improving rendering efficiency by **20%** and user satisfaction by **35%**; **led technical leadership** and **code reviews** for **4 junior engineers** and reducing sprint spillover by **15%** through **TDD** and **Agile** best practices.
- Designed and maintained **CI/CD pipelines** using **Jenkins** and **GitHub Actions** with **Docker** containerization, implemented observability and monitoring via **CloudWatch**, achieving **zero-downtime deployments** across all production environments.

### Software Engineer – Java Full Stack *May 2021 – Dec 2022*

*Bristol-Myers Squibb – Texas*

- Developed **HIPAA-compliant** enterprise web applications serving **5,000+ internal users** at **99.9% uptime**: engineered serverless microservices on **AWS Lambda + Docker** with **load balancing**, reducing maintenance by **20%** while scaling to **3x peak traffic**.
- Optimized **PostgreSQL** and **MySQL** queries and indexing strategies, cutting reporting pipeline runtime **from 4 hours to 45 minutes** — an **81% improvement** — enabling real-time business reporting.
- Integrated **REST APIs** with **6 external vendor systems** using **OAuth2** and **JWT**; built **Angular** and **React.js** SPAs with reusable component libraries, reducing frontend development time by **30%**, conducted **cross-functional** stakeholder collaboration and architecture reviews.

## PROJECTS

### Intelligent Business Process Automation Platform *2024 – Present*

*n8n | Spring Boot | Spring Cloud | OpenAI GPT-4 | Google Gemini | TypeScript | ECS | AWS Lambda | Docker | React.js | PostgreSQL | Kafka*

- Architected a **multi-agent AI automation platform** using **n8n** with event driven architecture that automates document processing, approval routing, and **AI-powered classification**, eliminating **40+ hours/week** of manual operations work across 3 departments.
- **Integrated OpenAI GPT-4 and Google Gemini APIs** with custom **prompt engineering** layers to extract structured data from unstructured inputs (emails, PDFs, forms) at **95%+ accuracy**, feeding downstream **Spring Boot** microservices via **REST APIs**.
- Deployed scalable **event-driven pipelines** on **AWS Lambda + Docker + ECS** with webhook triggers and distributed tracing; built **React.js/TypeScript** real-time monitoring dashboard with full audit logging in **PostgreSQL**.

### AI-Powered Job Search Automation (n8n Agentic Workflow) *2024*

*n8n | Google Gemini 2.5 Flash | Apollo.io | Google Sheets API | LinkedIn / Indeed / Glassdoor | OAuth2*

- Built a **3-phase agentic automation pipeline** using **n8n workflows** with **system design** principles that scrapes jobs across LinkedIn, Indeed, and Glassdoor, **AI-tailors resumes** via **Gemini API**, and automates **hiring manager outreach** via Apollo.io — reducing application time by **80%**.
- Implemented **Google Sheets API** tracking with auto-populated job status, match scores, and metadata across **200+ applications** — **zero manual data entry**.

## EDUCATION

**M.S. Computer Science** – Campbellsville University *Jan 2023 – Dec 2023*

**B.S. Computer Science** – The University of Texas at Dallas *Jan 2019 – Dec 2022*
